## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

the claimed invention is directed to non-statutory subject matter. Claims 7-15 is rejected as being non statutory. A protocol is a concept or simply a data structure comprising a set of instructions. In the above claims applicant is claiming a protocol in terms of what it does. However a protocol is not an apparatus or a means it is a data structure or concept hence non-statutory.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-15 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 6-15 is are single means claim i.e. where a means recitation does not appear in combination with another recited element of means, is subject to an undue breadth rejection under 35 USC 112, first paragraph(In re Hyatt, 708 F.2d 712, 714-715, 218 USPQ 195, 197(Fed Cir. 1983)) . In claim 7 applicant claim 1 protocol and it function.

Claims 1-5 are rejected because the method claimed lacks any appreciable steps. A means is not a step. A protocol cannot be claimed in means plus function format. A protocol is a data structure.
